Cell Differentiation, 20 (1987) 279, 280
Elsevier Scientific Publishers Ireland, Ltd.

Contents Volume 20

No. 1

Alberto Monroy 1913–1986 1

K. Yamana and H. Kageura (Fukuoka, Japan)
Reexamination of the 'regulative development' of amphibian embryos (*Review*) 3

M. Shioda and T. Shiroya (Tokyo, Japan)
Analysis of replicating DNA molecules from embryos of the sea urchin, *Hemicentrotus pulcherrimus*, by electron microscopy 11

V. Mouly, M. Toutant and M.Y. Fiszman (Paris, France)
Chick and quail limb bud myoblasts, isolated at different times during muscle development, express stage-specific phenotypes when differentiated in culture 17

H. Holthöfer (Helsinki, Finland)
Vascularization of the embryonic kidney. Detection of endothelial cells with *Ulex europaeus* I lectin 27

D.J. Webb and M. Charbonneau (Rennes, France)
Weak bases inhibit cleavage and embryogenesis in amphibians and echinoderms 33

F. Maruo and M. Okada (Ibaraki, Japan)
Monoclonal antibodies against *Drosophila* ovaries: their reaction with ovarian and embryonic antigens 45

L. Fucci, E. Vitale, C. Cirotto and G. Geraci (Naples and Perugia, Italy)
Evidences that hemoglobin switch in the chick embryo depends on erythroid cell line substitution 55

Y. Hamada, O. Yamashita and Y. Suzuki (Okazaki and Nagoya, Japan)
Haemolymph control of sericin gene expression studied by organ transplantation 65

Nos. 2 + 3

D. Bulmer, S. Peel and I. Stewart (Southampton, U.K.)
The metrial gland (*Review*) 77

L.H.K. Defize, C.L. Mummery, W.H. Moolenaar and S.W. de Laat (Utrecht, The Netherlands)
Antireceptor antibodies in the study of EGF–receptor interaction (*Review*) 87

C. Weber, H. Alder and V. Schmid (Basel, Switzerland)
In vitro transdifferentiation of striated muscle to smooth musle cells of a medusa 103

Y. Iwakura (Kyoto, Japan)
Effects of tunicamycin on the differentiation of F9 cells induced by either retinoic acid or retinoic acid and dibutyryl cyclic AMP 117

M. Betzalel and B. Moav (Tel Aviv, Israel)
Degradation of sperm histones in vitro by cytoplasm of the sea urchin egg 125

P. Andreuccetti, M.R. Barone Lumaga, G. Cafiero, S. Filosa and E. Parisi (Naples, Italy)
Cell junctions during the early development of the sea urchin embryo (*Paracentrotus lividus*) 137

L. Gualandris and A.-M. Duprat (Toulouse, France)
Structural alteration of the target plasma membrane affects reception but not expression of the neural inductive signal 147

C.L. Mummery, M.A. van Rooijen, S.E. van den Brink and S.W. de Laat (Utrecht, The Netherlands)
Cell cycle analysis during retinoic acid induced differentiation of a human embryonal carcinoma-derived cell line 153

Y. Wakamatsu, M. Obika and K. Ozato (Kyoto and Yokohama, Japan)
Induction of xanthophores from non-pigmented dermal cells of xanthic goldfish in vitro 161

M. Kédinger, P. Simon-Assmann, E. Alexandre and K. Haffen (Strasbourg, France)
Importance of a fibroblastic support for in vitro differentiation of intestinal endodermal cells and for their response to glucocorticoids 171

R. Adler (Baltimore, MD, U.S.A.)
Nature and nurture in the differentiation of retinal photoreceptors and neurons 183

P.J. Linser and M.S. Perkins (St. Augustine, FL, U.S.A.)
Regulatory aspects of the in vitro development of retinal Müller glial cells 189

B. Pessac (Villejuif, France)
Differentiation of retrovirus-infected avian neuroretina cells 197

H. Kondoh, Y. Ueda, S. Hayashi, K. Okazaki, K. Yasuda and T.S. Okada (Kyoto and Okazaki, Japan)
An attempt to assay the state of determination by using transfected genes as probes in transdifferentiation of neural retina into lens 203

G.J. Chader (Bethesda, MD, U.S.A.)
Multipotential differentiation of human Y-79 retinoblastoma cells in attachment culture 209

No. 4

T.C. Chambers, J. Song-Nichols, D.S. Campbell, E. Spitz, B.H. Leightling and H.V. Rickenberg (Denver and Colorado, U.S.A.)
Identification of nuclear substrates of the cyclic AMP-dependent protein kinase in *Dictyostelium discoideum* 217

D.H. O'Day and J. Rivera (Mississauga, Canada)
Lectin binding and inhibition studies reveal the importance of D-glucose, D-mannose and *N*-acetylglucosamine during early sexual development of *Dictyostelium discoideum* 231

C.A. Lessman (Antigonish, Canada)
Germinal vesicle migration and dissolution in *Rana pipiens* oocytes: effect of steroids and microtubule poisons 239

K. Shiokawa, K. Tashiro, K. Yamana and M. Sameshima (Fukuoka and Kagoshima, Japan)
Electron microscopic studies of giant nucleus-like structure formed by Λ DNA introduced into the cytoplasm of *Xenopus laevis* fertilized eggs and embryos 253

T. Maeda, M.K. Owada, H. Sugiyama, S. Miyake, Y. Tani, H. Ogawa, Y. Oka, T. Komori, T. Soma, S. Kishimoto, J. Seki, N. Sakato and A. Hakura (Osaka, Japan)
Differentiation of an Abelson virus-transformed immature B precursor cell line under the expression of tyrosine kinase activity of v-abl oncogene product 263

T. Akiyama, J. Matsumoto and T.T. Tchen (Yokohama, Jpan and Detroit, U.S.A.)
An association of actin isoforms with the expression of motile response in pigmentation variants induced from goldfish erythrophoroma cells 271

Cell Differentiation, 20 (1987) 281, 282
Elsevier Scientific Publishers Ireland, Ltd.

Cell Differentiation, 20 (1987) 283–285
Elsevier Scientific Publishers Ireland, Ltd.

Subject Index Volume 20

Abelson murine leukemia virus, B cell differentiation, tyrosine kinase, v-abl oncogene, 263
ACTH, chromatoblast, xanthophore differentiation, fish serum, db-cAMP, sepiapterin, 161
Actin isoform, goldfish erythrophoroma, stem cell clone, melanophoroma clone, motile response, functional differentiation, 271
db-cAMP, chromatoblast, xanthophore differentiation, fish serum, ACTH, sepiapterin, 161
cAMP-dependent protein kinase, *Dictyostelium discoideum*, nuclear phosphoproteins, cellular differentiation, 217
Ammonia, procaine, *Xenopus*, cell division, gastrulation, 33
Anthomedusae, in vitro transdifferentiation, muscle, transcription, translation, DNA replication, 103

B cell differentiation, Abelson murine leukemia virus, tyrosine kinase, v-abl oncogene, 263
Bombyx mori, transcription, differential splicing, juvenile hormone, 65
Bone marrow, metrial gland, pregnancy, immunology, differentiation, 77
Brush border enzyme, epithelial–mesenchymal interaction, coculture, intestine, differentiation, glucocorticoid, 171

Carbohydrate chain, F9 cell, retinoic acid, tunicamycin, cytokeratin, 117
Cell–cell interaction, intercellular bridge, gap junction, sea urchin embryo, 137
Cell–cell interaction, embryonic retina, neuronal–glial interaction, Müller glial cell, monoclonal antibody, lectin, 189
Cell culture, retinoblastoma, differentiation, photoreceptor, neuron, glia, 209
Cell cycle analysis, human teratocarcinoma, retinoic acid, differentiation, 153
Cell differentiation, tissue culture, neural retina, chick embryo, photoreceptor, 183
Cell division, ammonia, procaine, *Xenopus*, gastrulation, 33
Cell fusion, *Dictyostelium*, sexual development, lectin, phagocytosis, 231
Cellular differentiation, *dictyostelium discoideum*, cAMP-dependent protein kinase, nuclear phosphoproteins, 217
Chemical identification, hemoglobin, switch, chick, 55
Chick, hemoglobin, switch, chemical identification, 55
Chick, myoblast, limb bud development, quail, differentiation in culture, stage-specific phenotype, 17
Chick embryo, cell differentiation, tissue culture, neural retina, photoreceptor, 183
Chimeric embryos, pattern formation, regulation, *Xenopus*, 3
Chromatoblast, xanthophore differentiation, fish serum, db-cAMP, ACTH, sepiapterin, 161
Coculture, epithelial–mesenchymal interaction, intestine, differentiation brush border enzyme, glucocorticoid, 171
Colcemid, meiosis, meiotic maturation, taxol, nocodazole, estradiol, cytoskeleton, tubulin, 239
Commitment in cell differentiation, embryonic neural retina, lens differentiation, recombinant CAT genes, transfection, transdifferentiation, 203
Crystallins, quail, HH2, Rous sarcoma virus, neuronal markers, glutamic acid decarboxylase, 197
Cytokeratin, F9 cell, retinoic acid, tunicamycin, carbohydrate chain, 117
Cytoskeleton, meiosis, meiotic maturation, taxol, colcemid, nocodazole, estradiol, tubulin, 239

Degradation, sperm histones, in vitro sea urchin, eggs, 125
Dictyostelium discoideum, cAMP-dependent protein kinase, nuclear phosphoproteins, cellular differentiation, 217
Dictyostelium, sexual development, lectin, cell fusion, phagocytosis, 231
Differential splicing, *Bombyx mori*, transcription, juvenile hormone, 65
Differentiation, cell cycle analysis, human teratocarcinoma, retinoic acid, 153
Differentiation, epithelial–mesenchymal interaction, coculture, intestine, brush border enzyme, glucocorticoid, 171
Differentiation, kidney, lectin, *Ulex europaeus*, endothelium, vessel, 27
Differentiation, metrial gland, pregnancy, immunology, bone marrow, 77
Differentiation, retinoblastoma, cell culture, photoreceptor, neuron, glia, 209
Differentiation in culture, myoblast, limb bud development, chick, quail, stage-specific phenotype, 17
λ DNA, DNA microinjection, *Xenopus* fertilized egg, nucleus-like structure, 253
DNA microinjection, *Xenopus* fertilized egg, nucleus-like structure, λ DNA, 253
DNA replication, sea urchin embryo, electron microscopy, macrobubble, microbubble, initiation site, 11
DNA replication, in vitro transdifferentiation, muscle, transcription, translation, anthomedusae, 103
Drosophila, maternal factor, oogenesis, monoclonal antibody, immunohistochemistry, 45

EGF, EGF receptor, monoclonal antibody, signal transduction, mouse development, 87

EGF receptor, EGF, monoclonal antibody, signal transduction, mouse development, 87
Eggs, degradation, sperm histones, in vitro sea urchin, 125
Electron microscopy, sea urchin embryo, DNA replication, macrobubble, microbubble, initiation site, 11
Embryonic retina, cell–cell interaction, neuronal–glial interaction, Müller glial cell, monoclonal antibody, lectin, 189
Embryonic neural retina, lens differentiation, recombinant CAT genes, transfection, transdifferentiation, commitment in cell differentiation, 203
Endothelium, kidney, differentiation, lectin, *Ulex europaeus*, vessel, 27
Epithelial–mesenchymal interaction, coculture, intestine, differentiation, brush border enzyme, glucocorticoid, 171
Estradiol, meiosis, meiotic maturation, taxol, colcemid, nocodazole, cytoskeleton, tubulin, 239

F9 cell, retinoic acid, tunicamycin, cytokeratin, carbohydrate chain, 117
fish serum, chromatoblast, xanthophore differentiation, db-cAMP, ACTH, sepiapterin, 161
Functional differentiation, goldfish erythrophoroma, stem cell clone, melanophoroma clone, actin isoform, motile response, 271

Gap junction, cell–cell interaction, intercellular bridge, sea urchin embryo, 137
Gastrulation, ammonia, procaine, *Xenopus*, cell division, 33
Glia, retinoblastoma, differentiation, cell culture, photoreceptor, neuron, 209
Glucocorticoid, epithelial–mesenchymal interaction, coculture, intestine, differentiation, brush border enzyme, 171
Glutamic acid decarboxylase, quail, HH2, Rous sarcoma virus, neuronal markers, crystallins, 197
Goldfish erythrophoroma, stem cell clone, melanophoroma, actin isoform, motile response, functional differentiation, 271

Hemoglobin, switch, chick, chemical identification, 55
HH2, quail, Rous sarcoma virus, neuronal markers, glutamic acid decarboxylase, crystallins, 197
Human teratocarcinoma, cell cycle analysis, retinoic acid, differentiation, 153

Immunohistochemistry, *Drosophila*, maternal factor, oogenesis, monoclonal antibody, 45
Immunology, metrial gland, pregnancy, bone marrow, differentiation, 77
In vitro sea urchin, degradation, sperm histones, eggs, 125
Initiation site, sea urchin embryo, DNA replication, electron microscopy, macrobubble, microbubble, 11
Intercellular bridge, cell–cell interaction, gap junction, sea urchin embryo, 137
Intestine, epithelial–mesenchymal interaction, coculture, differentiation, brush border enzyme, glucocorticoid, 171

Juvenile hormone, *Bombyx mori*, transcription, differential splicing, 65

Kidney, differentiation, lectin, *Ulex europaeus*, endothelium, vessel, 27

Lectin, cell–cell interaction, embryonic retina, neuronal–glial interaction, Müller glial cell, monoclonal antibody, 189
Lectin, *Dictyostelium*, sexual development, cell fusion, phagocytosis, 231
Lectin, kidney, differentiation, *Ulex europaeus*, endothelium, vessel, 27
Lens differentiation, embryonic neural retina, recombinant CAT genes, transfection, transdifferentiation, commitment in cell differentiation 203
Limb bud development, myoblast, chick, quail, differentiation in culture, stage-specific phenotype, 17

Macrobubble, sea urchin embryo, DNA replication, electron microscopy, microbubble, initiation site, 11
Maternal factor, *Drosophila*, oogenesis, monoclonal antibody, immunohistochemistry, 45
Meiosis, meiotic maturation, taxol, colcemid, nocodazole, estradiol, cytoskeleton, tubulin, 239
Meiotic maturation, meiosis, taxol, colcemid, nocodazole, estradiol, cytoskeleton, tubulin, 239
Melanophoroma clone, goldfish erythrophoroma, stem cell clone, actin isoform, motile response, functional differentiation, 271
Membrane glycoconjugates, neural induction, neural commitment, neurogenesis, 147
Metrial gland, pregnancy, immunology, bone marrow, differentiation, 77
Microbubble, sea urchin embryo, DNA replication, electron microscopy, macrobubble, initiation site, 11
Monoclonal antibody, cell–cell interaction, embryonic retina, neuronal–glial interaction, Müller glial cell, lectin, 189
Monoclonal antibody, *Drosophila*, maternal factor, oogenesis, immunohistochemistry, 45
Monoclonal antibody, EGF, EGF receptor, signal transduction, mouse development, 87
Motile response, goldfish erythrophoroma, stem cell clone, melanophoroma clone, actin isoform, functional differentiation, 271
Mouse development, EGF, EGF receptor, monoclonal antibody, signal transduction, 87
Müller glial cell, cell–cell interaction, embryonic retina, neuronal–glial interaction, monoclonal antibody, lectin, 189
Muscle, in vitro transdifferentiation, transcription, translation, DNA replication, anthomedusae, 103
Myoblast, limb bud development, chick, quail, differentiation in culture, stage-specific phenotype, 17

Neural commitment, neural induction, neurogenesis, membrane glycoconjugates, 147
Neural induction, neural commitment, neurogenesis, membrane glycoconjugates, 147
Neural retina, cell differentiation, tissue culture, chick embryo, photoreceptor, 183
Neurogenesis, neural induction, neural commitment, membrane glycoconjugates, 147

Neuron, retinoblastoma, differentiation, cell culture, photoreceptor, glia, 209
Neuronal markers, quail, HH2, Rous sarcoma virus, glutamic acid decarboxylase, crystallins, 197
Neuronal–glial interaction, cell–cell interaction, embryonic retina, Müller glial cell, monoclonal antibody, lectin, 189
Nocodazole, meiosis, meiotic maturation, taxol, colcemid, estradiol, cytoskeleton, tubulin, 239
Nuclear phosphoproteins, *Dictyostelium discoideum*, cAMP-dependent protein kinase, cellular differentiation, 217
Nucleus-like structure, DNA microinjection, *Xenopus* fertilized egg, λ DNA, 253

v-abl Oncogene, B cell differentiation, Abelson murine leukemia virus, tyrosine kinase, 263
Oogenesis, *Drosophila*, maternal factor, monoclonal antibody, immunohistochemistry, 45

Pattern formation, regulation, chimeric embyros, *Xenopus*, 3
Phagocytosis, *Dictyostelium*, sexual development, lectin, cell fusion, 231
Photoreceptor, cell differentiation, tissue culture, neural retina, chick embryo, 183
Photoreceptor, retinoblastoma, differentiation, cell culture, neuron, glia, 209
Pregnancy, metrial gland, immunology, bone marrow, differentiation, 77
Procaine, ammonia, *Xenopus*, cell division, gastrulation, 33

Quail, HH2, Rous sarcoma virus, neuronal markers, glutamic acid decarboxylase, crystallins, 197
Quail, Myoblast, limb bud development, chick, differentiation in culture, stage-specific phenotype, 17

Recombinant CAT genes, embryonic neural retina, lens differentiation, transfection, transdifferentiation, commitment in cell differentiation, 203
Regulation, pattern formation, chimeric embryos, *Xenopus*, 3
Retinoblastoma, differentiation, cell culture, photoreceptor, neuron, glia, 209
Retinoic acid, F9 cell, tunicamycin, cytokeratin, carbohydrate chain, 117
Retinoic acid, cell cycle analysis, human teratocarcinoma, differentiation, 153
Rous sarcoma virus, quail, HH2, neuronal markers, glutamic acid decarboxylase, crystallins, 197

Sea urchin embryo, cell–cell interaction, intercellular bridge, gap junction, 137
Sea urchin embryo, DNA replication, electron microscopy, macrobubble, microbubble, initiation site, 11
Sepiapterin, chromatoblast, xanthophore differentiation, fish serum, db-cAMP, ACTH, 161
Sexual development, *Dictyostelium*, lectin, cell fusion, phagocytosis, 231
Signal transduction, EGF, EGF receptor, monoclonal antibody, mouse development, 87
Sperm histones, degradation, in vitro sea urchin, eggs, 125
Stage-specific phenotype, myoblast, limb bud development, chick, quail, differentiation in culture, 17
Stem cell clone, goldfish erythrophoroma, melanophoroma clone, actin isoform, motile response, functional differentiation, 271
Switch, hemoglobin, chick, chemical identification, 55

Taxol, meiosis, meiotic maturation, colcemid, nocodazole, estradiol, cytoskeleton, tubulin, 239
Tissue culture, cell differentiation, neural retina, chick embryo, photoreceptor, 183
Transcription, *Bombyx mori*, differential splicing, juvenile hormone, 65
Transcription, in vitro transdifferentiation, muscle, translation, DNA replication, anthomedusae, 103
Transdifferentiation, embryonic neural retina. lens differentiation, recombinant CAT genes, transfection, transdifferentiation, commitment in cell differentiation, 203
Transdifferentiation, in vitro, muscle, transcription, translation, DNA replication, anthomedusae, 103
Transfection, embryonic neural retina, lens differentiation, recombinant CAT genes, transdifferentiation, commitment in cell differentiation, 203
Translation, in vitro transdifferentiation, muscle, transcription, DNA replication, anthomedusae, 103
Tubulin, meiosis, meiotic maturation, taxol, colcemid, nocodazole, estradiol, cytoskeleton, 239
Tunicamycin, F9 cell, retinoic acid, cytokeratin, carbohydrate chain, 117
Tyrosine kinase, B cell differentiation, Abelson murine leukemia virus, v-abl oncogene, 263

Ulex europaeus, kidney, differentiation, lectin, endothelium, vessel, 27

Vessel, kidney, differentiation, lectin, *Ulex europaeus,* endothelium, 27

Xanthophore differentiation, chromatoblast, fish serum, db-cAMP, ACTH, sepiapterin, 161
Xenopus, ammonia, procaine, cell division, gastrulation, 33
Xenopus, pattern formation, regulation, chimeric embryos, 3
***Xenopus* fertilized egg,** DNA microinjection, nucleus-like structure, λ DNA, 253
